

## **APPENDIX B – FUND FOR MUNICIPAL AND OTHER PARTIES (§85-2.4)**

---

Due to a proposed voltage in excess of 125 kV and two proposed routes greater than 100 miles in length, the required fee under 16 NYCRR §85-2.4(a)(1) is a total of \$700,000. Checks for the required amount were submitted in 2013. The proposed routes remain the same in this updated Part A submittal and the alternatives described in this filing do not trigger a requirement for additional intervenor funding; thus, additional fees are not required.
