EXHIBIT 2
LOCATION OF NEW SCOTLAND TO LEEDS TO
PLEASANT VALLEY FACILITIES
(§86.3(a)(i) and (iii), (a)(2)(i)-(iv), (b)(iv) and §86.3(4))

EXHIBIT 2

LOCATION OF NEW SCOTLAND-LEEDS-PLEASANT VALLEY FACILITIES (§86.3(a)(i) and (iii), (a)(2)(i)-(iv), (b)(iv) and §86.3(4))

In accordance with 16 NYCRR §86.3(a)(1)(i) and (iii), (a)(2)(i)-(iv) and (b)(iv) and §86.3(4), as modified by the December 16 Order, this Exhibit 2 to this submittal provides the following detailed map sets showing the proposed ROW for the New Scotland-Leeds-Pleasant Valley component.

- Recent-edition topographic maps at a scale of 1:24,000 showing at least five miles on either side of the proposed ROW, along with the locations of known archaeological, geologic, historical or scenic area, park or untouched wilderness areas;
- Recent edition topographic maps at a scale of 1:250,000 showing the proposed transmission line with respect to the interconnected system; and
- Cross Sections of typical ROW depicting location and configuration of proposed and all existing overhead and underground facilities with typical design detail including height of structures and configuration of circuits for overhead facilities and diameter of pipe or conduit for underground facilities.

Per the December 16, 2014 Order, aerial photo mapping is not required to be included because North America is using 2010 or newer USGS topo data for the 1:24,000 mapping required by §86.3(a)(1). The aerial photo requirement of §86.3(b) will be provided in the Part B submittal.
